Plug it

Scan QR

Connected

Setup takes just moments, **plug it in, scan a QR code, and you're connected.** Once installed, SwarmGuard runs automatically in the background: no daily logins, no manual configurations, and no IT expertise required.

Why SwarmGuard?

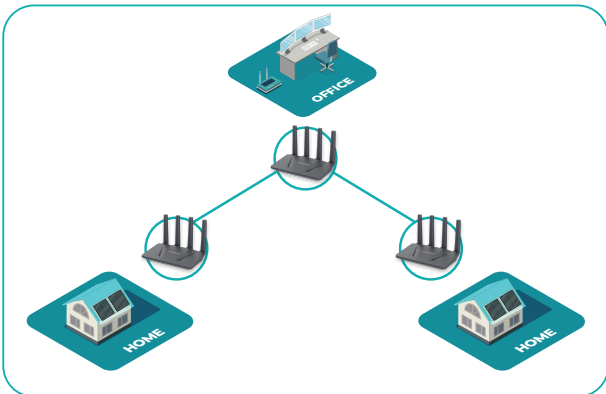

Easy to set up

No IT support is required to configure and activate the VPN connection. Simply download the app and follow the instructions.

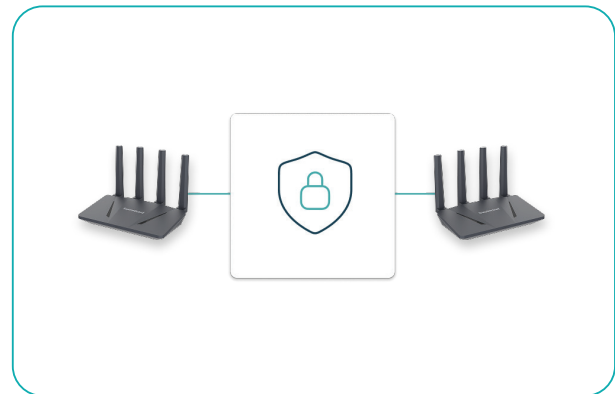

Optimized for small businesses and homeoffice

Bring your office network home using the device's built-in hotspot

VPN without Cloud intermediaries

SwarmGuard creates a direct, point-to-point VPN tunnel, no Cloud or external servers involved. This ensures secure, low-latency connections with end-to-end encryption by bypassing firewalls, NAT, and private LANs.

Stronger data protection

Fast and secure protocol that provides a strong end-to-end encryption, keeping the network secure and essentially unable to be intercepted by malicious actors.

VPN Link

- End-to-end encryption with WireGuard
- Direct point-to-point or relayed connection, depending on network restrictions (NAT, firewall, provider)

VPN network setup with mobile app

- Password-less user authentication: email address and onetime code via mobile text message (SMS)
- Device registration through QR code

Automatic, secure key distribution

- Mobile app scans QR code which identifies the device
- Mobile app sends public key end-to-end encrypted to the other devices

SwarmGuard Business Device Hardware IN-FD1800

Wi-Fi	600Mbps (2.4GHz), 1200Mbps (5GHz) 4 x external antennas
Ethernet	10/100/1000Mbps
Power	DC5521, 12V/1.5A (55*21*11mm)
Operating Temperature	0 ~ 40°C (32 ~ 104°F)
Dimension / Weight	210 x 120 x 36.8mm, 445g

Interface

Ethernet Port	4x LAN, 1x WAN
USB Port	1 x USB3.0 Type-A
LED Indicator	1 x dual-color LED indicator for Power and Internet
