

Power Monitor

Energy Management for Businesses

**Real-time
transparency
into your energy
flows**

**Start with a
single measurement
point and scale
flexibly**

**Universal data
compatibility
for seamless
integration**

This is how it works

 PowerMonitor

Submetering

The relevant electricity meters, consumers and producers are measured using sensors or submeters

Decentralized data

The data is translated to a unified data format, encrypted and stored to desired cloud or server

Application/API

The data can be used in the Power Monitor or via API in third-party applications

Install the Power Monitor Demo on your smartphone

See your energy flows, group data your way, and export insights with one tap.

Start now and discover where electricity is used in your company.

**TEST
DEMO**

&

**Enjoy
the Power
Monitor**
